

## **ULTRA MAX LITHIUM STANDARD (L91)**

| SPECIFICATION               |                            |
|-----------------------------|----------------------------|
| DESIGNATION                 | L91/AA                     |
| NOMINAL VOLTAGE             | 1.5V                       |
| TYPICAL CAPACITY            | 2900mAh                    |
| TYPICAL WEIGHT              | 15.5g                      |
| TYPICAL VOLUME              | 8.0cm <sup>3</sup>         |
| TERMINALS                   | Flat Contact               |
| CHEMICAL SYSTEM             | Lithium and Iron Disulfide |
| STORAGE TEMPERATURE RANGE   | -20°C~40°C                 |
| OPERATING TEMPERATURE RANGE | -20°C~60°C                 |

## **Important Notice**

Delivered capacity is dependent on the applied load, operating temperature and cut-off voltage. Please refer to the charts and discharge data shown.
